FASTPAKS ARE MODULAR/CUSTOMIZABLE

The Basic Unit is an 8-foot by 12-foot by 10.6-foot Structure

- >Create any multiple of the basic 96-square foot structure
- >Attached end-to-end or side-by-side
- >Omit interior walls and beams if desired
- >Add additional space as the need arises
- >Variety of interchangeable panels, including insulated hard sides with window and door options
- >Full magnetic electrical kit with circuit breaker; runs on direct electrical feed, generator, or solar
- >Combination heating/air conditioning unit

FASTPAKS ARE PORTABLE

Efficient Storage and Transportation

- >Folds flat to nearly 24-inches
- >24-folded units fit on a flatbed truck, reducing transportation costs by approximately 80%
- >Arrives 70% preassembled
- >Erected by 2 people in about 2 hours

FASTPAKS ARE SUSTAINABLE

Leaves no Environmental Footprint

- >No foundation required
- >Designed for durability
- >Stout steel construction withstands significant snow and wind loads
- >Store-and-stack when not in use
- >Side and end panels same size for easy replacement/exchange
- >Units can be moved while upright, containing up to 11,000 pounds of payload
- >Disinfectant can be sprayed top-to-bottom without harming interior or people

FASTPAKS ARE FOR COVID-19 RESPONSE

Public Health, Industrial and Social Applications

MEDICAL:

- >Mobile hospital
- >Test labs
- >Isolation area

SANITATION:

- >Interior/exterior can be entirely sanitized with Danolyte Global (an EPA Registered natural disinfectant) that eradicates Pseudomonas, Enterococcus, Staphylococcus, fungus, mold, E-Coli and much more

SOCIAL DISTANCING:

- >FastPaks can be configured with vinyl panels with screens to provide open ventilation with the convenience of an enclosed porch; *perfect for social distancing in food and beverage establishments*
